BORN AS OUR LOGO NOW SHAPING OUR DESIGNS

The CURVE shape represents our logo and defines a long number of our designs. It was born from a strong belief that simplicity lasts the longest, and a wish to create designs with an inviting appeal to be used on the table. Today the Curve shape stands as the ICON for many of our products.

Soft to the eye, the unique, organic CURVE shape invites you to create inspiring table settings and to bring people together in a friendly and relaxed atmosphere. Introduce the CURVE shape to your table by using LIND DNA Table Mats, Stoneware, Wood boxes, Cut&Serve, and Candleholders.

MADE IN DENMARK BY PREBEN LIND

LIND DNA was founded in 2013 with the ambition to rethink interior design from a sustainable perspective. Behind the company is Preben Lind, who is also the designer and owner of LIND DNA. The fact that we have founder, owner and designer within the company ensures that the development of new design and interior concepts always originates from the heart of LIND DNA.

DK

MADE IN DENMARK

All LIND DNA recycled leather designs are handcrafted in Denmark, ensuring unprecedented quality in every step of the production process.

SUSTAINABLE DESIGN

Sustainability is at the heart of the LIND DNA strategy. Our recycled leather is made from 80% recycled leather and 20% natural rubber.

CUSTOMIZATION

Our inhouse design and graphic team combined with our extensive range of colours provide great flexibility in supporting special customization ideas from our customers.

SHAPE / SIZE

With our very special inhouse production set-up, we can meet your wishes as for customization of size and shape. We can fit any setting to your tables and surroundings.

FLEXIBILITY & SPEED DELIVERY

Due to local production, delivery time is short for both customized and standard orders, which ensures the highest degree of flexibility.

EASY TO CLEAN

The unique combination of recycled leather and natural rubber gives a strong and durable material, which is very easy to maintain, and which will keep its look and feel through continued use.

RECYCLED LEATHER

The bedrock of most of our designs is OEKO-TEX® certified, recycled leather. Sourced from surplus production from the furniture and fashion industry, the vegetable-tanned core leather is first granulated, and then pressed together with natural rubber from trees. The result is a recycled leather quality, consisting of 80% core leather and 20% natural rubber – a material that is not only incredibly durable and water repellent but also easy to clean. Lastly, the recycled leather is dyed with water-based colour and embossed with beautiful surface textures and patterns.

COLLECTION OF COLOURS AND TEXTURES OF RECYCLED LEATHER

SERENE - THE AUTHENTIC

Leather SERENE is a very durable type of leather and differs from other LIND DNA qualities by being softer and more flexible, without compromising on strength and durability. The combination of these qualities makes SERENE stand out as our most authentic, high quality, leather type, which is very easy to clean due to a durable sealing coating. The material is 1,2 mm thick and consists of 80% core leather and 20% natural rubber.

NUPO - THE SOFT

NUPO is one of our most popular structures. It has an exclusive, suede-like surface, with a soft structure. NUPO is elegant and timeless - the perfect choice for almost any interior style. The material is 1,6 mm thick and consists of 80% core leather and 20% natural rubber.

HIPPO - THE 2-TONED

HIPPO is developed with inspiration from the world of animals and its characteristic structure with different depths creates a beautiful play between bright and darker shades across the surface. The material is

1,6 mm thick and consists of 80% core leather and 20% natural rubber.

REVERSIBLE - 2 IN 1

With a unique technique, we have created a two-in-one Reversible leather type with carefully combined colours and textures. The combinations are fixed and are perfect for table mats and glass mats in any shape and size, as well as for inlays, and menus.

Available in all standard shapes and sizes.
Mat thickness 2mm.

BULL - THE STRONGEST

BULL is one of LIND DNA's strongest structures. The slightly thicker structure makes the material incredibly durable and easy to maintain. With a small, fibrous pattern, the surface has a classic leathery look. BULL is soft, durable and conveys a slightly polished look. The material is 2 mm thick and consists of 80% core leather and 20% natural rubber.

DEEP CLEANING SOAP

For a thorough in-depth cleaning of Lind DNA Table Mats and Glass Mats, we have developed our DEEP CLEANING SOAP, which is a liquid soap, especially made for cleaning of products in recycled leather. Simply dilute the soap into a bit of water and wipe the mats over gently with a sponge, allowing the soap to foam up. Afterwards remove the foam with a damp cloth. For heavy cleaning, leave the foam on the product for a few minutes, and remove with a damp cloth. The DEEP CLEANING SOAP ensures that the mats stay perfect year after year.

CLEAN&CARE

CLEAN&CARE is our easy, universal cleaning spray for all leather products, LIND CURVE- and SILHOUETTE candleholders and vases. Just spray and wipe.
