Salvinelli has a long story of progress and development, but above all it has a story of experiences handed down from generations. It's founders, Salvinelli's brothers Costanzo and Faustino, created in the 1964 a little mechanical company and with the necessary instruments, they started to develop moulds for other local factories of cutlery.

The big requirements of the moulds and the satisfaction of the progress, lead them to create their own factory with the name "Fratelli Salvinelli" (Salvinelli's brothers) In the '70 years they expanded the mechanical department and they started to go in the market of cutlery and housewares.

È una storia di sviluppi e progresso quella dell'azienda di posateria Salvinelli, ma soprattutto è una storia di esperienze tramandate nelle generazioni. I suoi fondatori, i fratelli Costanzo e Faustino Salvinelli, nel 1964, crearono una piccola meccanica e con i dovuti strumenti del mestiere, iniziarono a costruire stampi di posate per conto di industrie locali.

La grande richiesta di stampi e la soddisfazione nel progredire con questo lavoro, li spronarono a creare un'azienda artigianale con il nome di "Fratelli Salvinelli".

Negli anni '70 ampliarono il reparto meccanica dell'azienda e iniziarono a farsi conoscere nel mondo del commercio di posate e casalinghi.

Salvinelli iniziò a farsi notare per la sua qualità nel lavoro, nelle rifiniture, nel gusto e cercò sempre di migliorarsi per raggiungere livelli sempre più alti.

50 ANNI DI MADE IN ITALY

In the '90 years the factory increased its work space into near buildings and it gradually expanded its work. The circle of production is made totally inside: from the planning to the development of the moulds, from the drawing of the new models of cutlery to the manufacturing, including the firing of the high quality models. Specialized people follow each phase of the production and they are always update about the technical manufacturing. The models of cutlery are created according to the fashion of the market and its own style, but above all Salvinelli produces all models in Italy. It's takes care about the news in the technological sector and it joins ability and style.

Negli anni '90 l'azienda ha trovato nuovi spazi per estendere le aree dell'attività in edifici confinanti in modo da non perdere la compattezza delle zone di lavoro. L'espansione fu un processo graduale e costante.

Tutto il ciclo produttivo della posateria è interno: dalla progettazione e creazione degli stampi, alle varie fasi di lavorazione delle posate, compresa la ricottura dei modelli di alta qualità, fino al confezionamento.

Ogni fase è seguita accuratamente da personale specializzato e sempre in aggiornamento.

I modelli sono progettati e ideati internamente secondo studi di gusto e di tendenze e tutti prodotti da Salvinelli in Italia, il quale si preoccupa non solo di modernizzare le tecniche di produzione, ma anche di andare incontro alle esigenze di stile e moda che il mercato esige.

INNOVAZIONE E DESIGN

In the first years of the 2000 Salvinelli satisfied its customers' needs, increasing its range of products. It started to import accessories for kitchen and serving, all made strictly in stainless steel.

All cutlery are still "MADE IN ITALY" and to strengthen this concept, Salvinelli joins to his logo, the slogan "Italian Cutlery Concept". Nowadays the factory has about 5.000 mq of mechanical department, warehouse, offices, showroom and meeting room. It's a big satisfaction propose more that 40 models of cutlery MADE IN ITALY including precious models till 5 mm of thickness.

Nei primi anni del 2000 la Salvinelli ha sentito l'esigenza di soddisfare ancora di più le esigenze dei clienti offrendo complementi d'arredo per la tavola e per la cucina.

Inizia così ad entrare nel mondo dell'importazione, ma solo per integrare la scelta di accessori da cucina che non possono essere prodotti internamente, ma tutti rigorosamente in acciaio inox.

Le posate rimangono sempre "MADE IN ITALY" e per rafforzare questo concetto la Salvinelli affianca al suo marchio lo slogan "Italian Cutlery Concept" cioè: concetto Italiano di posateria. Stile, ideazione, produzione, design, concretizzazione di idee e concetti, tutta la posateria Made in Italy.

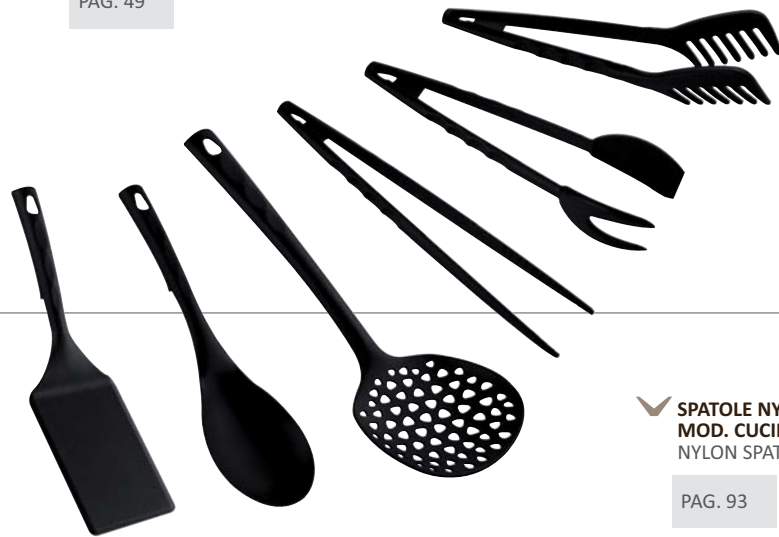

Ad oggi l'azienda vanta circa 5.000 mq di area produttiva, magazzini, uffici, showroom e sala conferenze. È una grande soddisfazione proporre più di 40 modelli di posate tutte MADE IN ITALY inclusi pregiati modelli fino a 5 mm di spessore.

PVD treatment is different from silver-plated, that is a film that recovers the surface, but is a special galvanic process realized in an ambient with controlled atmosphere.

The process permits to colour to penetrate into microporosity of the steel.

PVD is used in many works like as odontoiatria and other medical uses, so that it is a guarantee when the cutlery are in contact with foods. The result is a more hardness surface and the possibility to choose different colours maintaining the shine of the steel.

El resultado es una mayor dureza de la superficie y la posibilidad de obtener colores diferentes dejando inalterada la lucidez del acero. El PVD se utiliza en diferentes sectores como, por ejemplo, el ámbito médico y odontológico y esto garantiza su uso por lo que concierne la cubertería que está en contacto con los alimentos.

GIFT
REGALOS

A high-contrast photograph of silverware. A large silver spoon and a silver fork are the central focus, lying on a dark, reflective surface. The spoon is on the left, and the fork is on the right. In the upper left corner, there are white ceramic dishes: a shallow bowl and a small round cup. The lighting creates bright highlights on the metal surfaces and deep shadows on the dark background.
